

Technical Data Sheet

EverFlor - Degreaser

Clear liquid degreaser for floor preparation before coating

EverFlor Degreaser is a clear, water-based cleaner concentrate for floor preparation. It lifts oil, grease and general soiling out of a hard floor before a coating is applied. It also works as a cleaner on floors that have picked up contamination in service.

Most floor coating failures start with preparation. A film applied over oil or grease bonds to the contamination, not to the substrate, and releases under traffic. Brushing the diluted degreaser into the surface breaks the deposits down so they can be scrubbed loose and rinsed off with clean water. What is left is a clean floor to coat onto.

Use it as the first stage of an EverFlor floor coating specification, ahead of any EverFlor primer or floor paint. It suits interior and exterior hard floors and is supplied in 5 litre containers.

Areas of use:

- Preparation of concrete floors prior to painting or coating
- Removal of oil and grease deposits from hard floors
- General cleaning of contaminated floor areas, interior and exterior
- Cleaning down before repair work is carried out

Features:

- Clear liquid, so no colour is left behind on the floor
- Supplied as a concentrate, so one container makes up a large volume of wash solution
- Two dilution rates: 50:1 with water for general cleaning, 20:1 for heavy cleaning
- Lifts oil and grease out of the surface rather than moving it around the floor
- VOC content below 30 g/l, so it can be used in enclosed areas without solvent odour
- Applied with ordinary site kit - stiff broom, brush or mechanical scrubber
- Rinses off with clean water, leaving the substrate ready for the following coat
- Single component, no primer required, in 5 litre packs

Good to know

Apply and store between 5°C and 30°C. Do not use in freezing conditions.

Do not apply to new or wet concrete - under 21 days old, or holding residual moisture at 6% or higher.

Heavily contaminated floors may need a second pass. Check the surface after rinsing and repeat where staining or a greasy feel remains.

Allow the floor to dry before coating. Moisture trapped in the substrate will affect the coating that follows.

Do not allow washings containing oil and grease to enter surface water drains. Collect them and dispose of them in line with local requirements.

Pack sizes: 5 Litre

EverFlor - Degreaser

1 Dilution

The degreaser is supplied as a concentrate and is diluted with water before use. Mix 50:1 with water for general cleaning. Mix 20:1 with water for heavy cleaning. At 20:1 one litre of concentrate treats around 40m². Make up only as much as you can use across the section in hand.

2 Surface preparation and application

Sweep the floor and remove loose debris. Apply the diluted solution and brush it in with a stiff broom so it works into the surface. Use a brush or a mechanical scrubber to loosen heavier oil and grease deposits. Work in manageable sections rather than flooding the whole floor at once.

3 Rinsing and drying

Rinse the treated area with clean water. Check the surface once rinsed and repeat the process where staining or a greasy feel remains. Allow the floor to dry before coating - moisture left in the substrate will affect the primer or paint that follows.

4 Conditions and disposal

Apply and store between 5°C and 30°C. Do not use in freezing conditions. Do not apply to new or wet concrete under 21 days old, or where residual moisture is 6% or higher. Do not allow washings containing oil and grease to enter surface water drains; collect them and dispose of them in line with local requirements.

5 Safety

Read the safety data sheet for this product before use - it covers the hazards, the protective equipment and what to do if something goes wrong.

6 Ordering

Available direct from Jarvis Industries Ltd. All products are sold subject to the company's standard conditions of sale.

EverFlor - Degreaser

Specification

Appearance	Clear
Coverage	40m ² per Litre at 20:1 dilution
Number of coats	1 recommended
Application tools	Brush in with broom, the rinse treated area.
Usage location	Interior & Exterior
Suitable for	Preparation of concrete floors prior to painting or coating; removal of oil and grease deposits from hard floors; general cleaning of contaminated floor areas, interior and exterior; cleaning down before repair work is carried out
Application temperature	5-30
VOC content	< 30 g/l
Storage temperature	5-30
Shelf life	12 months in an unopened container
Number of components	1
Principal limitations	Do not apply on new or wet concrete (under 21 days with residual moisture content of or higher 6%). Do not use in freezing conditions.
Composition	Degreaser
Primer required	No primer required
Dilution	Mix 50:1 with water for general cleaning. Mix 20:1 with water for heavy cleaning.
Pack sizes	5 Litre

Drying and curing times are given at 20 °C and 50% relative humidity.

Storage & Handling

- Store upright in the original tightly closed container, in a cool, dry, well-ventilated place out of direct sunlight.
- Store between 5-30.
- Protect from frost.
- Keep out of the reach of children.

The information in this sheet is given in good faith and reflects our experience of the product at the date of issue. Conditions of use are outside our control, so it does not amount to a warranty. Anyone using the product should satisfy themselves that it is suitable for the intended purpose, and where the result matters, apply a trial area first.
